DETAILED ACTION

1. This action is responsive to communications: Application filed on 11/30/00 and claims benefit to the provisional application 60/168208 filed on 11/30/99.
2. Claims 1-8 are pending in the case. Claims 1, 5, and 7, are independent claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Microsoft PowerPoint 2000, 03/10/99, "Selling an Idea for a Product," pp. 1-9 (Hereafter known as "MPP2000").

-In regard to independent claims 1, 5, and 7, MPP2000 teach a slide presentation method, program, and system comprising:

collecting information (pp. 5: cost analysis benefits and pp. 4: problem solving features) relating to a presentation target;

Art Unit: 2178

creating a number of presentation definition templates (pp. 9: Templates), each template including a number of slide descriptions (pp. 1-8: Slides), certain of said slide descriptions including information place holders (pp. 1-8: Bullet (text) and Graphic (pictures)); and

generating a slide presentation (pp. 1-8) for a presentation target (pp. 3: Title) in accordance with the slide descriptions of a selected one of the templates (pp. 9: Selling a Product or Service), wherein collected information relating to the presentation target (pp. 5: cost analysis benefits and pp. 4: problem solving features) was substituted for the place holders (pp. 1-8: Bullet (text) and Graphic (pictures)) in the slide descriptions of the selected presentation template.

While MPP2000 teaches all the limitations of claims 1, 5, and 7, it was shown in Moseley et al. MPP2000 does not teach wherein information for more than one presentation target is collected. It would have been obvious to one of ordinary skill in the art at the time of the invention, for the sales organization of MPP2000 to have collected information on more than one customer, because they could have created additional tailored slide presentations to pitched their product, service, or idea to more customers and thus increased the probability of more sales and higher profits.

-In regard to dependent claim 2, MPP2000 further teach wherein the presentation targets are potential customers (pp. 3: Title) of a sales organization (pp. 1: Title), and wherein part of the collected information relates to potential sales opportunities (pp. 7: products, services, and ideas) between the sales organization and the potential customer based on (pp. 5: cost analysis benefits and pp. 4: problem solving features).

Art Unit: 2178

-In regard to dependent claims 3, 6, and 8, MPP2000 et al further teach wherein the presentation definition template used to generate the slide presentation for a presentation target was selected in accordance with a parameter (pp. 4: 1st Bullet and pp. 5: 1st Bullet) associated with the presentation target.

-In regard to dependent claim 4, MPP2000 et al further teach wherein the presentation target was a potential customer (pp. 3: Title) of a sales organization (pp. 1: Title), and wherein the parameter (pp. 4: 1st Bullet and pp. 5: 1st Bullet) associated with the presentation audience was a primary decision criterion (pp. 4: 1st Bullet and pp. 5: 1st & 2nd Bullet) of the potential customer.
